

Municipal Electric Provider

Joint Submittal by the Michigan South Central Power Agency

**Renewable Energy Plan Filing
Under PA 342 which amended Act 295**

On Behalf of Its Members; the

Village of Clinton – MPSC Case No. U-17385,

City of Coldwater – MPSC Case No. U-17386,

City of Hillsdale – MPSC Case No. U-17398,

City of Marshall – MPSC Case No. U-17404, and the

Village of Union City – MPSC Case No. U-17418

This joint filing by the Michigan South Central Power Agency (MSCPA) on behalf of its Members, the Village of Clinton, the City of Coldwater, the City of Hillsdale, the City of Marshall, and the Village of Union City, complies with Public Act 342 of 2016, which amends Act 295 of 2008 (the Act), the related December 4, 2008 Michigan Public Service Commission Order (MPSC Case No. U-15800), the related October 4, 2011, December 6, 2012 and March 28, 2017 Michigan Public Service Commission Orders entered in each of the cases associated with this filing (MPSC Case Nos. U-16603, U-16604, U-16616, U-16622, U-16636).

Section 25 (2) of the Act requires municipal utilities to file a twenty year plan to achieve renewable energy credit portfolio standards that are specified in Section 27. The plan must be filed with the MPSC within 120 days of the MPSC's temporary order, issued pursuant to Section 171. Each electric provider's plan must do the following:

- a) Describe how the provider will meet the RPS standards;
- b) Specify whether the number of megawatt hours of electricity used in the calculation of the renewable energy credit portfolio will be weather normalized or based on the average number of megawatt hours of electricity sold by the electric provider annually during the previous 3 years to retail customers in this state;
- c) Include the expected incremental cost of compliance with the renewable energy standards;
- d) Describe the manner in which the provider will allocate costs.

This document and its attachments satisfy all of the requirements of Section 25 (2) for the twenty year period running from 2009 through 2028.

Section 25 (2) (a) "Describe how the provider will meet the renewable energy standards"

The MSCPA, on behalf of its Members, will meet the renewable energy standards through the use of:

- a) Existing hydro resources for the City of Marshall and the Village of Union City; (*Section 11 (g) (iv) (B) and Section 11 (i) of Acts 342 and 295*)
- b) Existing hydro resources under purchase power agreements with N.E.W. Hydro, LLC; (*Section 11 (g) (iv) (B) and Section 11 (i) of Acts 342 and 295*)
- c) New hydro resources (AMP Hydro 1) currently operating through AMP; (*Section 11, (g) (iv) (B), Section 11 (i) and Section 29 (2) (e) of Act 342*). *This unit was previously qualified under Section 29 (2) (f) of Act 295.*
- d) New hydro resource (AMP Greenup) currently operating through AMP; (*Section 11 (g) (iv) (B), Section 11 (i) and Section 29 (2) (e) of the Act 342*)
- e) New hydro resource (AMP Meldahl) currently operating through AMP; (*Section 11 (g) (iv) (B), Section 11 (i) and Section 29 (2) (e) of the Act 342*)

The above described resources are further described in Attachment A.

Section 25 (2) (b) “Specify whether the number of megawatt hours of electricity used in the calculation of the renewable energy credit portfolio will be weather normalized or based on the average number of megawatt hours of electricity sold by the electric provider annually during the previous 3 years to retail customers in this state”

The MSCPA, and each of its Members, will be calculating their renewable energy credit portfolio requirements based on the average number of megawatt hours of electricity sold by each member annually during the previous three years to retail customers in this state.

Section 25 (2) (c) “Include the expected incremental cost of compliance with the renewable energy standards”

Following the *Filing Requirements and Instructions for Renewable Energy Plans for Municipally-Owned Electric Utilities* provided in Attachment C of the MPSC Order to implement PA 295, we have provided *Attachment B – Renewable Energy Plan Surcharge Summary* which details the compliance cost for each MSCPA Member. As shown in each Member’s *Attachment B*, MSCPA Members do not anticipate any additional costs of compliance associated with the renewable energy standards. Production costs for both the current and future hydro are not expected to add to MSCPA’s energy supply costs.

Section 25 (2) (d) “Describe the manner in which the provider will allocate costs”

Due to the fact that no additional cost of compliance is anticipated, there will be no charges allocated to MSCPA Member customers.

Attachment A – MSCPA Member Renewable Energy Resources

Existing Hydro Resources

Member Resources

City of Marshall – Owns and operates an existing run-of-the-river hydro facility consisting of two units with a combined capacity of 0.319 MW. During the past three years, this facility generated a total of 2,979 megawatt hours, an annual average of 993 megawatt hours, which equates to an average annual capacity factor of 35%.

Village of Union City – Owns and operates an existing run-of-the-river hydro facility consisting of two units with a combined capacity of 0.418 MW. During the past three years, this facility generated a total of 4,057 megawatt hours, an annual average of 1,352 megawatt hours, which equates to an average annual capacity factor of 37%.

Menominee and Oconto Falls

The MSCPA Members have purchased 8.56 MW of two hydro units located at Menominee, Michigan and Oconto Falls, Wisconsin under a twenty-year PPA with N.E.W. Hydro, LLC. These units are currently in operation and MSCPA will begin receiving power on July 1, 2013 from these units. The units have an installed capacity of 8.56 MW.

The allocation of interest in these projects for the participating MSCPA members is as follows:

Member	Capacity (MW)	Expected Annual Energy (MWh)
Village of Clinton	0.56	2,615
City of Coldwater	3.43	16,092
City of Hillsdale	2.18	10,259
City of Marshall	2.06	9,655
Village of Union City	.34	1,609

During the past three years, these facilities generated a total of 121,224 megawatt hours, an annual average of 40,408 megawatt hours, which equates to an average annual capacity factor of 54%.

AMP Hydro 1

Four of the five MSCPA Members have also purchased 13.4 MW of a hydro development project (AMP Hydro 1) through AMP, an Ohio not-for-profit corporation that provides energy related services to, at present, 134 municipal members located in seven states. The original hydro project consists of the development of three hydro generation stations at existing lock and dam facilities located on the Ohio River. These units were originally scheduled to be online in 2012, but with construction delays, the first two units became commercially available during 2016 and the final unit became commercially available late summer of 2017. Collectively, these units are expected to have an installed capacity of 208 MW, with an anticipated annual capacity factor of 55%.

The allocation of interest in this project for the participating MSCPA members is as follows:

Member	Capacity (MW)	Expected Annual Energy (MWh)
Village of Clinton	0.7	3,373
City of Coldwater	6.5	31,299
City of Hillsdale	3.4	16,372
City of Marshall	2.8	13,481

Please note that although the AMP Hydro 1 REC's are qualified for the MIRECS program under Section 29 (2) (f) and Section 11 (g) (iv) (B) of Public Act 295 of 2008 or Section 29 (2) (e) of Public Act 342 of 2016, that all RECS that were generated for 2016 and 2017 were (are being) sold into other markets, therefore those RECS are neither counted nor included on the Attachment B for either 2016 or 2017 of this Biennial Plan.

New Hydro Resources

AMP Greenup

Four of the five MSCPA Members have also purchased 2.1 MW of a second hydro project (AMP Greenup) through AMP, an Ohio not-for-profit corporation. The hydro project consists of two hydro generation stations at existing lock and dam facilities located on the Ohio River. Collectively, these units are expected to have an installed capacity of 70 MW, with an anticipated annual capacity factor of 60%. This hydro project qualified for the renewable energy program, effective April 20, 2017, with the passage of Public Act 342.

The allocation of interest in this project for the participating MSCPA members is as follows:

Member	Capacity (MW)	Expected Annual Energy (MWh)
Village of Clinton	0.1	378
City of Coldwater	1.2	6,131
City of Hillsdale	.4	2,499
City of Marshall	.4	2,030

Please note that although the AMP Greenup REC's are qualified for the MIRECS program under Section 29 (2) (e) and Section 11 (g) (iv) (B) of Public Act 342 of 2016, all RECS that were generated for 2017 were (are being) sold into other markets, therefore those RECS are neither counted nor included on the Attachment B for the year 2017 of this Biennial Plan.

AMP Meldahl

Four of the five MSCPA Members have also purchased 3.2 MW of a second hydro project (AMP Meldahl) through AMP, an Ohio not-for-profit corporation. The hydro project consists of two hydro generation stations at existing lock and dam facilities located on the Ohio River. Collectively, these units are expected to have an installed capacity of 105 MW, with an anticipated annual capacity factor of 60%. This hydro project qualified for the renewable energy program, effective April 20, 2017, with the passage of Public Act 342.

The allocation of interest in this project for the participating MSCPA members is as follows:

Member	Capacity (MW)	Expected Annual Energy (MWh)
Village of Clinton	.1	576
City of Coldwater	1.7	9,342
City of Hillsdale	.7	3,807
City of Marshall	.6	3,093

Please note that although the AMP Meldahl REC's are qualified for the MIRECS program under Section 29 (2) (e) and Section 11 (g) (iv) (B) of Public Act 342 of 2016, all RECS that were generated for 2017 were (are being) sold into other markets, therefore those RECS are neither counted nor included on the Attachment B for the year 2017 of this Biennial Plan.
