

ONLY FIBER TECHNOLOGY CAN KEEP PACE WITH BUSINESS DEMANDS

CBPU Telecom strives to be your hometown communications leader by bringing you state-of-the-art technology at affordable prices. At the top of this list is our fiber optic network.

WHAT IS FIBER?

Optical fiber is a hair-thin strand of glass, which uses light to transmit data. It's the only technology that delivers enough bandwidth—reliably and at a low enough cost—to meet the ever-increasing demand. Fiber can carry high bandwidth signals over long distances without signal degradation. Other benefits include:

- **Greater Bandwidth** – Fiber has the capability to transport virtually unlimited bandwidth to keep pace with changing technology and growing data needs. Our system is designed to maximize speeds to each and every customer and, unlike most systems, never “share” bandwidth between neighbors.
- **Greater Reliability** – Fiber optic cables are less susceptible to glitches than traditional copper wires and can withstand the shock and vibration from inclement weather. We built our system with multiple redundancies to help keep your business running.
- **Future Flexibility** – Fiber is considered “future proof” because ongoing improvements in fiber optic equipment increase available bandwidth without having to change the fiber.
- **Greater Security** – Since our technology gives every customer their own dedicated fiber link, it is inherently more secure against cyber criminals.

When connected to the CBPU Telecom fiber optic network, your business will be ready to meet the challenges of today and tomorrow.

CALL CBPU TELECOM AT 517-279-9531 TO PUT YOUR BUSINESS ON FAST FORWARD

One amazing speed. One affordable price. With CBPU's Telecom's “Only-GIG” plan, you're always making the best choice. Thanks for considering CBPU Telecom as your business solutions partner.

BUSINESS FIBER INTERNET

Get The Speed You Need To Succeed

Comerstone Group © 2022

CBPU Telecom's Fiber Optic Network Offers Blazing Fast Gig Internet Speeds

Our fiber optic network is capable of providing today's highest-grade broadband solutions directly to your business. Through this network, you can now get Internet speeds up to 1 Gig and beyond. Imagine how far your business could go at that pace!

With the faster speeds of our Business Fiber Internet, you can look forward to these advantages:

- **Increased Efficiency and Productivity** – High speeds are a huge timesaver and productivity booster, since you can do whatever your business is doing now (such as data transferring, downloading and uploading) but do it more quickly. You can also eliminate the annoying, time-wasting occurrence of buffering.
- **Improved Reliability** – CBPU Telecom understands how important your Internet connection is to the functioning of your business. Our fiber optic network is designed for maximum uptime, and you can count on it to meet your needs.
- **Enhanced Collaboration** – Our Business Fiber Internet enables your business to stay in closer contact with customers, vendors, and employees with technologies like cloud services, file sharing, instant messaging, and teleconferencing.

Reach your business goals faster with CBPU Telecom's Business Fiber Internet.

SYMMETRICAL BUSINESS FIBER INTERNET

The CBPU Telecom fiber optic network equips us to deliver the fastest and most reliable Internet service in our area.

Our service is symmetrical, meaning you will be able to upload data to the Internet just as fast as you can download it. Upload speed is important for tasks such as using VoIP phone service, transforming data files, web conferencing, cloud computing, video streaming and more. We can help your business run smoothly no matter what tasks you have to complete.

Business Fiber Internet - 1 Gig x 1 Gig \$79.99/mo.

MANAGED WIFI

Let CBPU manage your Wi-Fi to ensure you get full-strength, uninterrupted connectivity from your GIG-Fiber experience.

Small Business Managed WiFi:

Plume Managed WiFi with One Pod \$9.99/mo.
Each Additional Pod \$7.99/mo.

Medium/Large Business Managed WiFi:

Designed and configured based on your needs.

Gig = 1,000 Megabits per second. Speed based on best effort and customer premises equipment (CPE). Installation charges start at \$249.00 and pricing may vary depending on location. Certain restrictions apply. See www.coldwater.org for full rules, rates, and regulations.

BUSINESS PHONE AND TV SERVICES

In addition to Business Fiber Internet, CBPU Telecom also offers Phone and TV services. Contact us to learn how we can meet the communications needs of your business.
